Mike:

Just wanted you to know how much the travel department appreciates the outstanding contributions to our section by Howard Finberg and the entire graphics department.

I had been in the department less than 48 hours when Howard dropped by to say how much he thought his staff could add to our presentation. Indeed they have. A quick look at our issues on Door County and O'Hare are great examples of how much the graphics department enhanced our packaging.

I have yet to hear Howard say, "We can't do it. We're swamped." Considering the volume of work they produce, I know it isn't always easy.

They're a willing, talented gang of people, and I think we all are lucky to be working with them.
